THE 1<sup>ST</sup> ANNUAL  
**MAEVE FINTAK**  
**CHARITY GOLF TOURNAMENT**

Presented By:  
**TIGER TOWN TAVERN**  
**Boscobel Golf & Country Club**  
14 March 2009

**THE CAUSE AND GOAL**

**The Tournament:**

- The 1<sup>st</sup> Annual Maeve Fintak Charity Golf Tournament will be the first in a long line of fundraising efforts by The Maeve Fintak Foundation to raise awareness of Noonan Syndrome to the medical community as well as those affected by the complex nature of this syndrome.

**The Honoree:**

- Maeve Elizabeth Fintak is the first and only child of Brigid and Stephen Fintak (Clemson University Alumni Class of 2001). Maeve was diagnosed with Noonan Syndrome after 3 weeks of observation and care at the Northside Hospital Neonatal Intensive Care Unit in Atlanta, Georgia. Her symptoms ranged from a critically low platelet count to poor oxygenation of the blood due to an abnormal pulmonic valve (pulmonic stenosis) in her heart. After spending 4 ½ months at home with her parents, she required an emergency trip to Atlanta's Children's Hospital. While there, a successful open-heart surgery was performed to correct the defective valve. During her tumultuous 2 month recovery, Maeve's chest had to be reopened 5 times to relieve pressure inside of her chest cavity as a direct result of complications derived from her syndrome. On May 13<sup>th</sup> 2008, Maeve Fintak lost her battle against Noonan Syndrome and passed away at the age of 7 months and 8 days. This foundation is for her.

**The Goal:**

- The goal of this foundation is to raise awareness of Noonan Syndrome, a complex genetic disease that affects 1 in 1,000 to 1 in 2,500 people worldwide. Everyday there is a child born with this condition, yet many of them will go undiagnosed. It is our mission to educate the public as well as the medical community of this widespread syndrome that is associated with congenital heart disease. Your donation and sponsorship will help fund research and bring educational seminars to those who are unaware of the symptoms of Noonan Syndrome
